

THE EDITO

By Vincent Trély

Vincent Trély is the founder and president of APSSIS, Association pour la Sécurité des SI de Santé. He is the creator of the National Congress on Health IS Security.

2023: the year of cybersecurity in healthcare

The shock dates back to November 2019. The leaders of France's largest hospitals were stunned by the situation at Rouen University Hospital and the international media's coverage of the event. For the first time, the healthcare system, at all levels, became aware of the operational and political consequences of a cyber-attack on a major university hospital.

Diversity and inclusion: the cyber technology sector must expand its pool of talent

By Xavier Biseul

To overcome the structural deficit in talent, the sector would do well to attract more women and those with neurodivergent backgrounds. Many such initiatives are popping up with the support of associations like CEFCYS and the Cyber Excellence Cluster.

Certification: is European cybersecurity battle-ready?

By Richard Dalleau

Whether it's heightened competition with China and the United States or the Russian-Ukrainian conflict spilling into cyberspace, European cybersecurity is still reacting to dangers in a disorganized fashion. Can EU certifications remedy this, or even serve as an instrument of European power? Jean-Pierre Quémard, board member of the Alliance pour la Confiance Numérique (ACN), provides some insight into the issue.

OPERATIONAL SECURITY

How to raise employees' awareness of cybersecurity issues and why

By Olivier Cimelière

The number of cyberattacks is increasing but, in many businesses, there is still a persistent feeling that it only happens to others. Is this a dangerous state of denial, a misunderstanding of cyber technology issues or technological presumptuousness? Employees must be made aware of the growing threat through regular in-house communication.
