THE EDITO

By Philippe Martin

Editorial director of Régions Magazine since 2012, he was previously a journalist, then head of local editions at the regional daily Nord-Eclair, Director of Continuing Education at the Ecole Supérieure de Journalisme in Lille and finally Director of Development at the regional weekly press group Sogémédia.

Local authorities declare war on cybercrime

They spend two months looking around your information system. They crash the entire system in two hours. And it takes you two years to recover. The 2-2-2 principle is an apt summary of what cybercriminals do when they attack companies, hospitals or local authorities.

Questions raised concerning the cyber component of the Military Programming Law

By Ronan Cotten

Although essential, the handful of measures included in the French Military Programming Law (LPM), designed to strengthen the capacity of the French National Cybersecurity Agency (ANSSI) to detect and anticipate vulnerabilities and attacks on our critical digital networks, have raised a series of technical and legal questions. The private sector insists on the need for debate on these complex issues.

CYBER RISKS

No, an AI-piloted drone did not turn against its operator, at least not officially

By Stanislas Tarnowski

What if AI turned on its creator and a combat drone killed its human operator? This Terminator-like scenario is not the work of some science fiction author, but the result of combat AI simulations led by the US Air Force. Or perhaps not, as the USAF has firmly denied comments made recently by one of its officers at a conference.

DIGITAL TRANSITION

Geopolitical issues surrounding semiconductors, the "oil of the 21st century"

By Adèle Forveille

Semiconductors are an essential component of mobile phones, cars, satellites and missiles. As such, these electronic chips pervade every part of our daily lives. They are also a major challenge when it comes to industrial independence. The shortage caused by the increase in demand for connected objects during the Covid-19 pandemic highlighted the industry's dependence on Asia.

SAVE THE DATE - InCyber Forum Europe

October 25 & 26

The 15th edition of the International Cybersecurity Forum (FIC) Europe was held on April 5, 6 and 7, 2023, at the Grand Palais in Lille. With a record number of visitors and partnerships, the FIC continues to establish itself as the industry's major event, and the place to announce European initiatives in cybersecurity and digital confidence.
